

The OVC Human Trafficking Collective

Supporting OVC's Human Trafficking Victim Service Grantees

The OVC Human Trafficking Collective (HTC) delivers training and technical assistance (TTA) exclusively to OVC Human Trafficking Victim Service Program grantees and their partners, including customized TTA designed to meet the needs of grantees, their teams, and community partners.

ABOUT THE HTC

The purpose of the HTC is to (1) support OVC's human trafficking victim service grantees and their partners in meeting award goals and objectives and (2) provide practitioner-driven, evidence-based TTA on delivering services to victim service providers.

The HTC understands that effective TTA requires a collaborative approach that leverages the expertise of all training recipients and subject matter experts to further elevate the support provided to victims of trafficking. This collective approach leads to sustainable actions that are rooted in best practice, in addition to innovative solutions that meet the unique needs of each agency.

The HTC's TTA support is available to OVC human trafficking victim service grantees (including those providing tailored services to minor victims of sex and labor trafficking).

HTC STAFF & TA NAVIGATORS

HTC Staff:

HTC SUPPORT OFFERED

Proactive Grantee Support

Provide program consultations and needs assessments, policy/procedure review and feedback, and peer support facilitation/mentoring to ensure grantees meet their award goals and objectives. All work is done collaboratively with lived experience experts and field professionals to support and respond to evolving grantee needs.

Real-Time Innovation

Host monthly office hours, quarterly communities of practice calls, and trainings on topics such as:

- Exploring and conducting equity audits
- Addressing community and partner service gaps
- Strengthening programmatic structure

Resource Sharing & Network Navigation

Develop and share important resources relevant to victim service providers; disseminate new and existing OVC TTA provider and other federal resources.

Data Collection & Analysis

Support surrounding data collection, analysis considerations with best practices, evaluation, and program integration.
